

FEES – METABOLIC PHENOTYPING

Services	Internal	Academic	Company
Pancreatic islets isolation (per rat)	\$165	\$190	\$295
Pancreatic islets isolation (per mouse)	\$145	\$170	\$255
Static insulin secretion on isolated islets with insulin assay (per point)	\$5	\$6	\$9
Dynamic insulin secretion (perfusion) on isolated islets with insulin assay (per point)	\$3	\$4	\$6
Insulin or glucose tolerance test (per rat)	\$55	\$65	\$100
Insulin or glucose tolerance test (per mouse)	\$45	\$55	\$80
Hyperglycemic clamps with insulin and C-peptide assays (per rat)	\$340	\$400	\$615
Hyperglycemic clamps with insulin and C-peptide assays (per mouse)	\$325	\$385	\$590
Hyperinsulinemic euglycemic clamp with insulin assay (per rat)	\$225	\$270	\$410
Hyperinsulinemic euglycemic clamp with insulin assay (per mouse)	\$215	\$250	\$385
Experimental design and CIPA protocol (hourly fee)	\$35	\$50	\$100
Blood biochemistry analysis	on request		
Diabetes and/or obesity models	on request		
Energy metabolism measurements in vivo	on request		

* Animal purchase, housing fees and surgeries are included in the fees for all the tests *in vivo* and islets isolation

** Additional fees for quarantine for imported animal from another institution.

** Prices could vary according of the experimental design of the project (number of conditions, treatment, etc...)

The prices are subject to change without notice.
