

## Research Center of the Centre hospitalier de l'Université de Montréal

The Research Center of the Centre hospitalier de l'Université de Montréal (CRCHUM) is the largest research center in biomedical sciences and health care at the University of Montreal, and among the largest in Canada. Located at the Champs de Mars metro station, the CRCHUM offers a dynamic and innovative work environment in ultramodern facilities at the cutting edge of technology.

The CRCHUM promotes job stability and supports the development and professional improvement of its employees who benefit from a full range of social benefits (flexible hours, teleworking policy, pension plan (REGOP), generous leave policy).

## General Description

The pandemic has created a rapid transition to the use of telemedicine. While virtual care offers opportunities to improve access to care, high-quality evidence on validated telemedicine tools are lacking. This FRQS-funded project aims to evaluate the effectiveness and acceptability of web-based telemedicine tool to support primary care clinics in caring for their older patients.

The MSc student will gain expertise in evaluating a randomized trial in a real-world setting on a high-priority topic, that of developing effective and equitable web-based tools to support the transition to telemedicine in our health care system. The student will have access to already-collected randomized trial data from four primary clinics in Quebec to develop their thesis.

The student will be supervised by Dr. Nadia Sourial (School of Public Health, Department of Health Management, Evaluation and Policy) and be integrated within her research team and the larger Research centre of the CHUM.

## Qualifications

- ✓ The student must be officially enrolled in a graduate program of the Université de Montréal in one of the following Faculties: School of Public Health, Faculty of Medicine, Faculty of Nursing, Faculty of Arts and Sciences. Experience required and field
- ✓ Holds a bachelor's (BSc) or master's (MSc) degree in a relevant discipline (e.g., epidemiology, biostatistics, health services/administration, public health, social sciences, biomedical research,).
- ✓ Experience with SAS, R or other statistical software would be an asset.

## Status and advantages

- ✓ A stipend (Master's: \$ 20,000) is available for a period of one year.
- ✓ The student is expected to apply for a scholarship at one or more funding institutions (e.g. FRQ, CIHR) in the fall 2022.
- ✓ Location of workplace: Centre de recherche du CHUM / Research Center of the CHUM, 850 rue St-Denis, Montréal (Québec), H2X 0A9
- ✓ Flexibility of the schedule and work from home possible

## To Apply

Interested candidates should e-mail their documents to:  
**[nadia.sourial@umontreal.ca](mailto:nadia.sourial@umontreal.ca)**

1. A motivation letter (1-2 pages) outlining academic experience, future goals and alignment between research interests and the proposed project;
2. Curriculum vitae;
3. Most recent transcript (Bachelors or Masters)

*Only successful candidates will be contacted for an interview.*

*The CRCHUM invites women, Aboriginals, visible minorities, ethnic minorities and people with disabilities to apply. The CRCHUM adopts a broad and inclusive definition of diversity that goes beyond applicable laws. The CRCHUM thus encourages all people, regardless of their characteristics, to apply. In accordance with Canadian immigration requirements, please note that priority will be given to Canadian citizens and permanent resident.*
